### (54) IMAGE READER

#### (57)Abstract:

PURPOSE: To add prescribed index information automatically to each file by surely recording read information to each file while sorting the information to each file even when plural files are set at a time.

CONSTITUTION: The image reader reads and records an original by using a read sensor 9 such as an image scanner unit. Partition paper 23 for separating files is inserted before and after files F1, F2. When the image reader senses the partition paper 23 in the case of read processing, the read information of originals 21, 22 before and after the partition paper 23 is recorded as the information for different files, and index information comprising bar codes 24, 25 is added to each separated file.

### LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
